

425-MBS

The MaxVac MV-425-MBS is a single phase turbine vacuum for use in most situations. Powered by a side channel type turbine unit it is completely maintenance free and can provide round the clock service.

This type of motor requires no transmission therefore making it very silent. A thermal switch is fitted in case of overheating. A vacuum gauge is fitted to enable suction levels and helps to detect when the filter is blocked.

The vacuum is fitted with M Class filters which are cleaned using manual filter shake system operated by a handle on the side of the vacuum.

The vacuum is fitted with a bin to collect the waste. A bag can be fitted in the bin as needed.

RECOMMENDED ACCESSORIES

FEATURES

Turbine Motor

- Use 24 hours a day
- Silent
- Ultra tough and long lasting
- No brushes to change

Compact design

Model	MV-425-MBS
Voltage	110v 50hz / 230v 60hz
By-Pass Motor	1.8Kw
Vacuum Rate	1800mm/H2O
Filter Type	Antistatic Polyester
Filter Surface	20000cm ²
Protection	IP65
Air Flow	250m ³ /h
Capacity	45L
Suction Inlet	Ø80mm
Noise Level	76dB(A)
Dimensions (cm)	55w x 98d x 115h
Weight	90Kg
