

# DUST BLOCKER 500

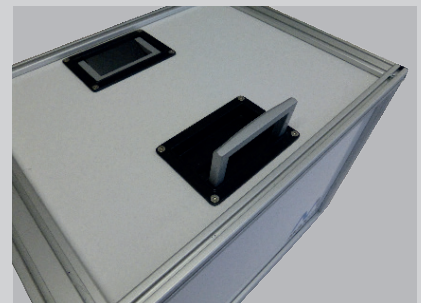

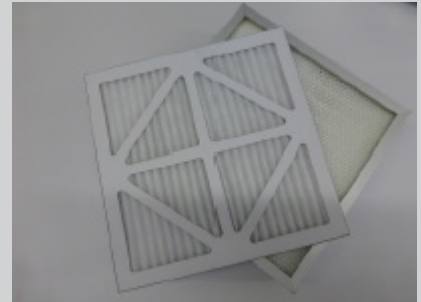

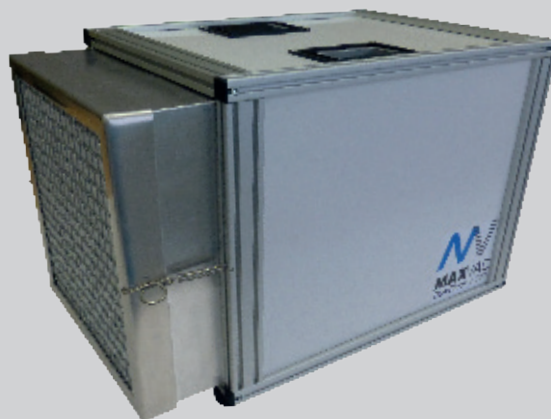

The Dustblocker 500 has been developed to remove the unseen dust in an area of work. The first recommendation is to collect the dust at source but not every particle of dust can be captured.

Designed to be able to operate 24 hours a day it can continually work to clean the air you breathe. It is suitable for many applications from woodworking shops, machine rooms, repair workshops, bakeries, renovation areas and any other areas where silica dust from concrete, brick grout or mortar may be present.

It is a quiet machine and is easily used in occupied buildings when renovations or refits are being carried out.

With Hepa 14 filtration you can be certain that the filtration is to the highest standard protecting both you and the people you are working with. For rooms needing a negative pressure then a duct can be attached to the machine to take the exhaust out of the sealed room.

- Compact
- Light (19kg)
- Aluminium housing
- Ultra-tough design
- Easy operation
- 3 stage filter
- Audible and visual alarm for blocked filters

Voltage 110 / 240v

Power 180w

Air Flow 1500m<sup>3</sup>/h

Air Flow (filters) 500m<sup>3</sup>/h

Filter Type HEPA 14

Warranty 2 years

Noise Level 61dB(A)

Dimensions (cm) 38w x 45d x 58h

Weight 19Kg
