The Dustblocker Pro range has been designed for larger buildings, Construction Sites and Manufacturing Plants to provide high levels of air filtration to decrease airborne dust particles. This keeps products and workplaces clean, and improves working conditions to ensure a more healthy workforce.

With Hepa 14 filtration you can be certain that the filtration is to the highest standard protecting both you and the people you are working with.

For rooms needing a negative pressure then a duct can be attached to the machine to take the exhaust out of the sealed room.
